Autistic Program Classes

Classroom instruction is centered around the students' IEP goals. For some of our students this would include: daily living skills, social skills, labeling items, and appropriate behaviors. For our higher functioning students their IEPs address academic skills such as: math, reading, writing, spelling, computer skills, social skills, and attending general education classes.

MD Program

We are a living skills program with a focus of applying classroom instruction to skills students will need in the real world. Students

receive self contained instruction in the MD classroom for reading, math, health, English, science, living, and social skills.

SCI/ Resource

Classes

Language! - This is a two period class and they will be working on writing and grammar.

System 44: This is a reading program designed to meet the needs of each student individually. It is a one period class. They will spend half of the class on the computer and the other half receiving instruction.

SCI Math: Work on math skills to improve on telling time, counting money, adding, subtracting, multiplying and compute and problem solve.

SCI Science: Works on middle school science curriculum including science projects in a smaller class setting.

Resource: Intended to work on IEP goals and provide support for general education classes. Resource is not intended for homework completion for general education classes.
