

VERA FRENCH

Dear Parent/Guardian:

Pediatric Integrated Health is a relatively new, free program for children with Medicaid insurance that offers support services for children with a mental, emotional or behavioral health diagnosis. The program is not a building or place to live; it's a new approach to care that provides a team of professionals who work together with your family to meet your child's needs. Enrolling in this program will not change your Medicaid benefits nor will you have to change services providers. Integrated Health adds resources and support.

Our team is available to work with your entire family to make sure your child receives the best care possible. We offer many kinds of support such as helping with school meetings, managing health issues, helping you connect to community resources and possible funding sources, understanding application forms, offering parent peer support and helping you find transportation to and from appointments if needed.

We recognize you are the expert on your child's and family's needs. Our goal is to support you and your child while assisting you in navigating the complex healthcare system. Once enrolled, we will be available to help you immediately or when the need arises.

If you'd like more information, please contact ***Stephanie Henderson, Administrative Assistant at 563-888-6246.***

We look forward to hearing from you.

Sincerely,

Michelle A. Nicholson
Director of Integrated Health
