2024 RUBE GOLDBERG COMPETITION January 27, 2024

Gather your engineer friends and family members to form a team. We will be following the national Rube Goldberg Competition theme and rules.

\$15 per team to participate. This event is open for all ages. Sign-up soon, as we have a 25-team capacity.

LET YOUR IMAGINATION RUN WILD

The Inventor's Club, at the Putnam, is an exclusive opportunity for aspiring inventors and curious minds. Join us for a 5-session monthly Rube Goldberg workshop, September thru January, where you will learn all about the fascinating techniques behind Rube Goldberg machines.

During these workshops, our expert instructor will guide you through the process of designing and building your very own Rube Goldberg contraptions. From simple chain reactions to complex sequences, you will gain hands-on experience and develop a deep understanding of these mesmerizing machines.

Prepare For Our Rube Goldberg Competition

By participating in the Inventor's Club, you will also have the chance to prepare for our annual Rube Goldberg competition, on January 27, 2024. Put your creativity and problem-solving skills to the test as you compete against other talented inventors for the ultimate prize.

Don't miss out on this incredible opportunity to immerse yourself in the world of Rube Goldberg and unleash your inner inventor. Whether you are a beginner or have some experience in engineering, this workshop is open to kids of all skill levels in 5th thru 8th grade. Join us at the Putnam and let your imagination run wild!
